

Name: _____ Unit: _____ Date: _____ Pd: _____

Project: Endocrine Glands, Disorders, Hormones, and Fun

A & P Honors

In this unit - you will become an expert on a particular endocrine gland, its hormones produced and any disorders that result from imbalances. This project will count as a test grade, as we will not have a test for this unit. However, you will be held responsible for the information that will be presented to you by your classmates – there will be basic information from this unit on the final. Below are the requirements for the project as well as a general outline of the points that will be given for each project component.

Research Requirements

- 1) You will be assigned one of the 8 endocrine glands provided
- 2) Research your gland
- 3) Description of gland- location, appearance
- 4) Hormones produced
- 5) Action of hormone in body (what it does in the body)
- 6) Hyper/hypo diseases associated (overproduction and underproduction)
- 7) Common causes of dysfunction
- 8) Other interesting information

Project Requirements

Present your findings to the class in an interesting and creative manner such as:

- Poster, game, video, skit, *PowerPoint etc.*
- And **a brochure that will be provided to all members of the class**

➤ **Due Tuesday, April 7th**

There will not be a test on the endocrine system.

All sources need to be included. Plagiarism will result in a zero on the project.

Everyone's notes will depend on the quality of your presentation!
